

Do Dang Minh Luan

Front-End Developer Intern / Fresher

Year of Birth: 2005 | Location: Ho Chi Minh City | Email: dodangminhluan@gmail.com

Phone: +84 918607139 | GitHub: github.com/MinLD

SUMMARY

Third-year Software Engineering student experienced in projects Web development with TypeScript/JavaScript, Python, React/Next.js, Express.js/Flask, PostgreSQL, and MySQL. Uses AI tools to support development and seeks practical experience as a Software Engineer.

EDUCATION

Nguyen Tat Thanh University (NTTU) - Software Engineering Technology 2023 - Present

GPA: 3.4 / 4.0

Top 3 - University Software Engineering Competition, academic year 2024-2025

Top 3 - University Artificial Intelligence Competition, academic year 2025-2026

SKILLS

Programming Languages: TypeScript, JavaScript (ES6+), Python, SQL

Frontend: React, Next.js 16, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, Flask, RESTful API, JWT, OAuth 2.0, RBAC, Socket.IO

Database: PostgreSQL, MySQL, Prisma, SQLAlchemy, MinIO, Cloudinary, Redis, Meilisearch

DevOps & Tools Docker, Nginx, Git, GitHub, GitHub Actions, basic CI/CD

PROJECTS

ACADEMIC PROJECT LIFECYCLE MANAGEMENT PLATFORM Jun 2026 - Present

Full-stack Developer

Built an academic project lifecycle platform supporting end-to-end thesis workflows, from topic registration and lecturer assignment to reviews and evaluation. Developed the frontend with Next.js and TypeScript and a modular monolith REST API with Express.js, using PostgreSQL and Prisma. Implemented multi-tenancy, scoped RBAC, and direct document uploads to MinIO via presigned URLs.

Technologies: Next.js, TypeScript, Express.js, PostgreSQL, Prisma, MinIO

GitHub: <https://github.com/MinLD/ThesiFlow>

LUTEST - AUTOMATED WEB UI TESTING May 2026 - Present

Full-stack Developer

Built a local-first CLI/Worker that analyzes ASTs to identify pages, routes, components, and APIs, generating a Production Project Graph. Used Playwright to scan routes, viewports, and SPA states while collecting DOM geometry, screenshots, errors, and bounding boxes. Applied AABB to detect overlaps, overflow, out-of-viewport elements, and small click targets, with WCAG 2.2 contrast checks and OKLCH color recommendations.

Technologies: Next.js, TypeScript, Node.js, Express.js, Playwright, TypeScript Compiler API, npm monorepo

CINEFLUENT - AI-POWERED ENGLISH LEARNING THROUGH MOVIES Dec 2025 - May 2026

Full-stack Developer

Built an English-learning-through-movies platform using Next.js, TypeScript, Python/Flask, MySQL/SQLAlchemy, and JWT. Integrated bilingual subtitles for word/phrase lookup, flashcards, vocabulary exercises, listening dictation, and speaking shadowing. Stored movies on Google Drive, streamed via Nginx/HLS, and added 1:1 video calls with WebRTC and Socket.IO.

Technologies: Next.js, TypeScript, Tailwind CSS, Python, Flask, Socket.IO, JWT, OAuth 2.0, MySQL, SQLAlchemy, Google Drive, WebRTC, Gemini API, Docker, Nginx, AWS EC2
